

Updated information regarding Covid policies and procedures.

After several years of strict guidelines and procedures due to covid, we are happy to say that Pre school is back to normal operating procedures.

Hygiene has always been paramount in the setting so children will continue with hand washing in the mornings after circle time as well as all the usual hand washing after toileting and before snack and lunch times.

We continue to follow all our usual policies and procedures but of course we will keep updated with any future information or changes to any guidelines as necessary.
